

# Key Fob

## Multi-mode

Change Home/Away mode for custom sensor setup

## Programmable

Program a button to turn on multiple lights and the set the thermostat where you like it

## Peace of Mind

Setup notifications to alert you about any unauthorized entry whenever you're away.

### Notes

The written directions that come with the fob are wrong. You must press the lock button less than a second to pair the fob.

Since the fob only generates events and the Almond+ does not yet support doing anything with these events, there is not much you can do with the fob right now.

## Product Description

Compatible with ZigBee HA 1.2	4-button pad with one user-defined key
Easy to carry pocket-sized design	One dual-color LED for status indication
Up to 2-years battery life with one replaceable Lithium CR2032 battery	Radio frequency 2.4GHz
